

VisuNet

## HMI SOLUTIONS BASED ON NETWORK TECHNOLOGY

PEPPERL+FUCHS

**VisuNet** is the world's first HMI platform for the process industry to communicate using Ethernet TCP/IP network structures and eliminates completely proprietary connection techniques. Ethernet-based connection networks commonly used in the automation sector can now be used for PC-based visualization in harsh industrial atmospheres commonly found in process environments.

**VisuNet** integrates all the benefits of a modern network infrastructure based on standard Ethernet components – into simple remote monitor solutions where the display, keyboard, and mouse are located up to 2 km away from the PC in the safe area. VisuNet can also be used as a full-scale panel PC installed in the field. Since Fast Ethernet with TCP/IP protocol is becoming more popular in automation technology, existing network infrastructures can be used without any problems.

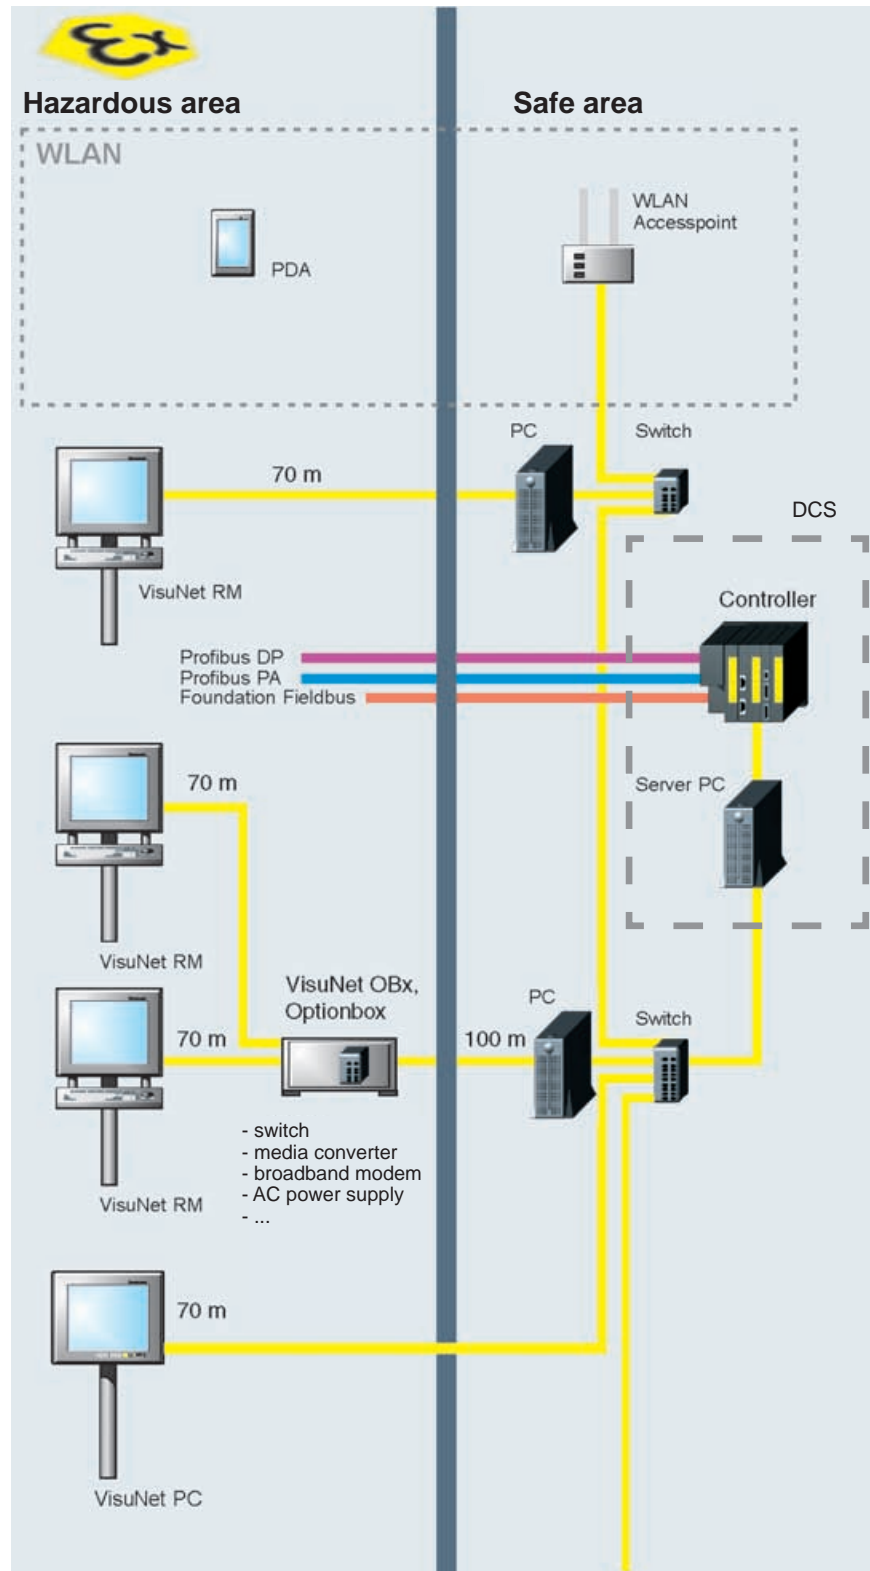

The **VisuNet** platform consists of

- VisuNet PC, Panel-PC solutions
- VisuNet RM, Remote monitor stations
- VisuNet OBx, Optionbox configurable with power supply and network components

The **VisuNet** devices are designed for installation according:

- ATEX, category II 2G (zone 2 gas)
- ATEX, category II 2 D (zone 21 dust) (limited models)
- IEC Ex, zones 1/21 (in preparation)
- or in standard industrial environment (other in preparation)

and comply with even the toughest requirements requiring to robustness, safety and functionality.

## VisuNet PCEX410/412, established system solutions!

- Neutral PC platform --- genuine PC functionality
- Network Technology --- Ethernet connectivity
- USB/Serial interfaces --- connection to the process / barcode reading systems / others
- Pepperl+Fuchs software package --- data security / data recovery / others
- Selection of operating systems --- Windows 2000, Windows XP Professional / others

### Panel-PC = operator panel + PC unit

This combination of an operator panel and a powerful, integrated PC unit provides an ideal platform for control and display panels with a customer-defined visualization system, for soft PLC systems, for client-server applications or for browser-based terminals.

The VisuNet PC415/419 panel PCs, designed for the hazardous area, define new benchmarks in

- PC performance
- housing design
- modular concepts

and offer optimal conditions for peripheral visualization and processing of information.

The integrated Ethernet interface allows connections into existing network infrastructure. In combination with the VisuNet Option box OBx, it is possible to connect several VisuNet PCs directly on site in the hazardous area and bridge distances up to 2 km.

## Panel PC for challenging demands in industrial environments!

- Neutral PC platform --- genuine PC functionality
- Network technology --- Ethernet connectivity
- USB/Serial interfaces --- connection to the process / barcode reading system / ...
- Pepperl+Fuchs software package --- data security / data recovery / ...
- Selection of operating system --- Windows 2000, Windows XP Professional, ...
- Front access --- optimized installation and maintenance
- Stainless steel front plate --- complies with the toughest requirements
- Modular concept --- customized solutions based on standard components  
(display, keyboard, mouse, housings, mounting parts)

### Panel-PC = operator panel + PC unit

This combination of an operator panel and a powerful, integrated PC unit provides an ideal platform for control and display panels with a customer-defined visualization system, for soft PLC systems, for client-server applications or for browser-based terminals.

### VisuNet RM uses RDP!

The VisuNet RM remote monitors for PC-based visualization of processes and plants are based on the popular and widely used Ethernet network technology and TCP/IP protocol that are already familiar to all Internet and intranet (corporate network) users and eliminates the need for the traditional KVM point-to-point topology. Visunet opens up totally new and flexible opportunities for interfacing the monitors to the PC in the safe area.

The actual data transfer (screens, inputs, etc.) from the PC of the operator station to the remote monitor takes place over the network using TCP/IP packets. The functionality itself – the so-called remote desktop protocol (RDP) – is a standard integrated feature in the operating system (e.g., Windows XP Professional).

## The first PC Remote Monitor station based on network technology designed for use in process environment!

- Reduction of hardware components --- reduction of system cost
- Network technology --- Ethernet connectivity
- Front Access --- optimized installation and maintenance
- Modular concept --- customized solutions based on standard hardware components (display, keyboard, mouse, housing, mounting types)
- Open system platform --- integration into existing network infrastructure

## VisuNet has front access!

- Front access --- optimized accessibility for installation and maintenance
- Modular concept --- housing variants to meet customer requirements  
(Housing, barcode reader holder, scanner holder, option casing for emergency stop, indicator lamps, pushbuttons,..., mounting systems)
- Various stainless steel types --- 1.4301/304, 1.4404/316L (option)

Pedestals and brackets in stainless steel, fixed, turnable or tiltable, for floor, wall and ceiling mounting are standard components of the modular VisuNet concept.

### Options

#### Mounting types

- Direct wall mount
- Pedestal
- Ceiling mount
- Support-Arm

#### Adapter options

- Adapter turnable
- Adapter tiltable

The optional housings of the VisuNet product family are compact, made entirely of stainless steel, designed to meet the toughest ergonomic requirements, and optimized for a wide variety of applications

The housings comply with an IP66 degree of protection.

Customized versions are available.

## I.S. keyboard/mouse systems! ... connect directly to VisuNet RM/PC systems!

### Description

#### Versions

K1	Keyboard without mouse
K3	Keyboard with track ball mouse
K4	Keyboard with touch pad mouse
K5	Keyboard with optical track ball mouse ( <i>zone 22 only</i> )
K6	Keyboard with joy stick mouse ( <i>in preparation</i> )
...	further options on demand

#### Keyboard Layout

105 short travel keys, about 3 Mio strokes  
DE, US, FR, CN, DK, SE, ...

#### Dimensions (WxHxD)

Dimension	482.6 x 177.8 x 45 mm
Cut out dimension	450 x 150 mm

#### Front plate

Anodized aluminum, polyester foil  
Degree of protection IP65 (K3 [not operated], K5, K6), IP66 (K4, K1)

#### Interfaces, I.S.

USB

#### Ratings

Supply voltage	from VisuNet RM/PC
Ambient temp. operations	0 °C ... +50 °C
Ambient temp. storage	(-20 °C ... +50 °C in combination with keyboard heating)
	-20 °C ... +60 °C

#### Approvals

ATEX	II 2G Ex ib IIC T <sub>4</sub>
IEC Ex	II 2D, Ex ibD 21 T <sub>130</sub> °C ( <i>Zone 21 Dust</i> ) (-K1, -K4, -K6)
Others	Zones 1, 21 ( <i>in preparation, depending to the keyboard type</i> )
	on demand

#### Housing (optional)

Stainless steel	1.4301/ 304
	1.4404/ 316L (optional)
Degree of protection	IP65 (K3 [not operated], K5, K6), IP66 (K4, K1)

#### Weight (housing)

5 kg

## VisuNet OB Options Box, the first modular extension concept designed for the hazardous area!

- Modular concept --- customized solutions based on standard components (power supply, media converter, network components,...)
- Stainless steel housing --- complies with the toughest requirements
- Approvals for hazardous area --- designed for process environment

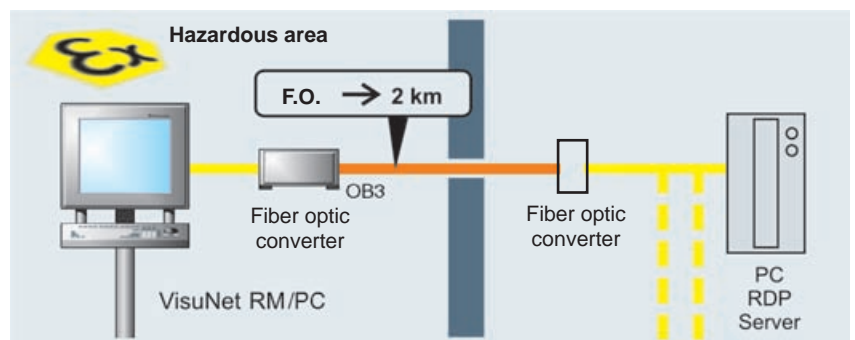

The VisuNet OBx Option Box, facilitates the implementation of customized requirements that include

- AC power supply
- Data transmission
- Network infrastructure
- Connectivity to user specific devices (WLAN accesspoint etc.)

### Solution for long distances!

In general, long, nonsegmented distances, are bridged by:

- Isolated / noise free 2-wire fiber optic cable (max. 2000 m)
- Copper wire based broadband modem (max. 1000 m)

Description	OB11	OB31
<b>Modul Concept</b> AC power supply, 100-240 V +/- 10 %, 50 - 60 Hz Fiber optic converter + 4 port switch + PoE* Broadband modem (DSL) Others on demand	•	• • • •
<b>Dimensions (WxHxB)</b> Dimension	452 x 191 x 110 mm	450 x 285 x 226 mm
<b>Approvals</b> ATEX	Ex II 2G, Ex eq [ib] IIC T4 and Ex II 2D, Ex tD A21 IP 64 T85°C Zones 1, 21 (in preparation) on demand	Zones 1, 21 (in preparation) on demand

## Industrial plant data collection for the process automation in the hazardous area

The SCANEX family of rugged, industry-standard, barcode reading systems from Pepperl+Fuchs is the ideal solution for computerized plant data collection in the hazardous area. It comprises an intrinsically safe, hand-held reader with a laser scanner and a hand-held reader with radio data transmission and a rechargeable battery for mobile applications while a stationary miniature scanner completes the product range. The barcode readers can be connected directly to VisuNet RM and PC systems.

### EX-DRAGON-D101/D101-LR, I.S. cable barcode scanner

- II 2G, EEx ib IIC T4; II 3D T80 °C IP53
- Temperature range: 0 °C to +40 °C
- Reading distance: 60 - 1100 mm
- Degree of protection: IP53

### EX-DRAGON-M101, I.S. radio barcode scanner

- II 2G, Ex ib IIC T4, II 3D, Ex T80 °C IP53
- Temperature range: 0 °C bis +40 °C
- Reading distance: ca. 60 - 1100 mm
- Approx. 30.000 readings with one battery charge
- Radio radius: max. 50 m
- Radio frequency: 433.92 Mhz (Europe)
- Transmitting power: 10 mW
- Degree of protection: IP53

### EXOM-DRAGON, I.S. radio base station

- II 2G, EEx ib IIC T4, II 3D, EEx T80 °C IP53
- Temperature range: 0 °C to +50 °C
- Connection distance: max. 230 m to VisuNet RM/PC
